Installation Instructions

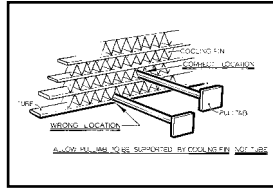

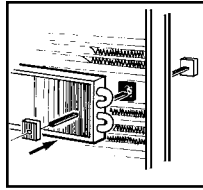

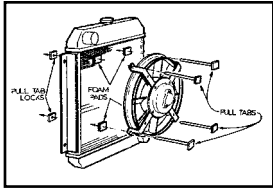

This guide covers the following Item Number:

105

Universal Mounting System

IMPORTANT! READ ALL INSTRUCTIONS BEFORE BEGINNING INSTALLATION.

This product can be used to attach an electric fan or oil cooler to the radiator. Push nylon strap through the fan bracket or cooler, then place a foam pad between the two items. Next, place through the radiator core and A/C condenser, if applicable. For cross-flow radiators, make sure that the strap is supported by the radiator fins, not the cooling tubes. Now, install the pull tab lock onto the strap, and pull tight. Cut off excess strap. U.S. Patent Number 4,617,702
