Congratulations, you have made a wise decision.
Thank you for purchasing our product.

IMPORTANT! READ ALL INSTRUCTIONS BEFORE BEGINNING INSTALLATION.

Heavy Duty Wiring System

Pay close attention to the exact position and location of the mounting tab and terminal spades. With the relay on its side and the mounting tab on the top, wire as follows (see illustration). The **red wire** goes to the **battery or power**. The **yellow or orange wire and brown wire** go to the **fan motor(s)**. The **black wire** is connected to **ground**. The **white wire** is connected to a **toggle switch, thermal sensor switch, or air conditioning relay or pressure switch**. When the **brown wire** is **not used**; terminate it with the end cap supplied. **Damage, burn out or short can result, if wired incorrectly.**
